

## Creator of a schedule in SchedulePro

### Overview

Timing is very important when it comes to schedule creation. A lot of times a schedule will appear incorrect due to when it was created. To help give more transparency into the process we have added a field that will show when and who created the schedule. This will help identify most schedule creation timing issues.

### After Automation

#### Schedule Details

Info	History	Dates	
Division	RHR	Project Manager	-
Community	Benns Grant Th (BN)	House Type	2
