

Multi Schedule View in SchedulePro

Overview

Managing multifamily products can sometimes be difficult because they require the same resources. To help with this we have designed a feature we are calling the multi Schedule View. From this page you will be able to see a full 2 week window of multi lots at the same time. Having all of the same functionality as the single lot view, you can easily stagger your trades or complete multiple tasks at one time.

1. Select the lots you want to see
2. Click the action button
3. Select View

The screenshot displays the SchedulePro interface. At the top, there are filters for 'Div/Comm' (set to 1), 'Status' (Under C...), 'Columns' (12), and an 'Actions' button. Below the filters is a table with columns: 'Division', 'Comm Desc', 'Lot/Unit', 'Start', 'Proj PSD', 'Allowed DUC', 'Current Int Task', and 'Open Issue(s)'. The first six rows of the table are selected, indicated by checked checkboxes in the first column. A red box highlights these checkboxes. A red arrow points from the 'Actions' button in the top bar to the 'Allowed DUC' column of the selected rows. A secondary actions menu is shown on the right, with a red box highlighting the 'View' button.

- 2 Week window

*Prompting can be used with multi select if the dates are on the same day

The screenshot displays the SCHEDULEPRO software interface. At the top, there is a navigation bar with buttons for navigation, 'Prompting', 'Sort', and 'Actions'. Below this is a grid showing a 2-week window for four different locations: Pelican-estuary (TAM-BC-0026C), Pelican-estuary (TAM-BC-0026D), Pelican-estuary (TAM-BC-0026E), and Egret-estuary (TAM-BC-0026F). Each location's schedule is shown in a grid format with columns for days of the week (Mon-Fri) and specific dates (7/25/16, 7/26/16, 7/27/16, 7/28/16). Tasks are represented as colored blocks within this grid. A red arrow points to the 'Prompting' button in the top navigation bar.
