

Understanding the Start Schedule Tool in SchedulePro

Overview

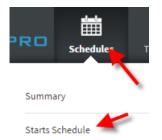

The page was designed to manage your start schedule with plant capacity in mind. The tool will allow you to change your anticipated start dates while also giving you the ability to forecast you package requirements. There are other features built in based on user feedback.

General Notes

- 1. You can make as many "what if" start changes as 1 time
- 2. If you leave the page before you click Save, nothing will be changed
- 3. This tool was designed to be used on a PC
- 4. DMS dates are updated on a nightly basis, not real time
- 5. Chart is sorted by SchedulePro Date
- 6. Plant automation only affects packages with a DMS date with the firm weeks
- 7. Date request changes within firm weeks needs to follow current process
